Nikola Tesla – UFO and Dynamic Theory of Gravity | Genius. Nikola Tesla: The Dynamic Theory of Gravity of Nikola Tesla explains the relation between gravitation and electromagnetic force as a unified field theory (a model over matter, the aether, and energy). It is a unified field theory to unify all the fundamental forces (such as the force between all masses) and particle responses into a single theoretical framework.

Dynamic Theory of Gravity. Nikola Tesla ' s life (1856 – 1943) spanned two scientific periods: that of the 19th century which saw the universe as filled with an invisible matter, " the aether " , and that of the 20th century which saw the universe as an empty vacuum with bits of matter in random motion. As an example of the difference between these two world views when the idea of the electron was proposed at the end of the 1800s it was then pictured as a spinning vortex of this aether ...

Tesla's theory states that the phenomena produced by electromagnetic forces is the most important phenomenon in the universe. According to portions from his theory, mechanical motions are universally a result of electromagnetic force acting upon and through media. Unfortunately, no mathematical details of the theory have officially surfaced.

If we replace the words electromagnetic, electric, magnetic with gravity we can deeper understand Tesla's work on that line: "The theory I propose may therefore be called a theory of the Electromagnetic Field, because it has to do with the space in the neighbourhood of the electric or magnetic bodies, and it may be called a Dynamical Theory, because it assumes that in that space there is matter in motion, by which the observed electromagnetic phenomena are produced."

Speculations about Tesla's Dynamic Theory Of Gravity- All ponderable bodies are constantly in motion in through space. Absence of a medium would result in no electromagnetic forces (the space-vacuum fabric is a medium, the aether (the ultimate medium)) Ponderable bodies and other media filling space all possess a dielectric level.

In an article, Man ' s Greatest Achievement, Tesla outlined his Dynamic Theory of Gravity by saying that the luminiferous ether fills all space. The ether is acted upon by the life-giving creative force and is thrown into " infinitesimal whirls " (" micro helices ") at near the speed of light, becoming ponderable matter.
