downward acceleration. This crops up frequently in A-level questions. However, it's easy to deal with. Simply always use acceleration as: a = g = 9.81 ms-2 downwards. For example: Drop a stone from a cliff. Initially, t = 0, u = 0, and a = + 9.81 ms-2 (Note: I've chosen down to be positive here) Or Throw a stone upwards at 10 ms-1

This website is primarily an A-level physics revision website for students who want to gain further insight into their A-level course. It is also meant to be a useful tool for teachers to hopefully give a fresh perspective on old turf. The website follows the AQA syllabus although there are overlaps with other syllabuses (yes this is a correct plural).
