AS1288-2006 now specifies that glass panels within 1000mm of floor level situated in schools and childcare facilities and within 1500mm for aged care, retirement villages and nursing homes must be Grade A Safety Glass. Although this is beyond the general requirements of the code, annealed glass is permitted above these height restrictions.

AS1288-2006 Review: The New Standard in Glass - Valiant Glass

AS1288-2006 is the Australian standard which determines the glass types and glass thickness requirements for all buildings across the country. Adherence to AS1288-2006 implies that we often need to use thicker glass for our large windows and doors. We constantly refer to the following table which describes maximum areas for safety glass (for fully framed windows and doors).

Glass thickness requirements - AS1288 - Nu-Line Windows

This Standard has a NEW Supplement, AS 1288 Supplement 1-2006, which includes over 200 pages, detailing a variety of tables for the minimum glass thickness calculated for the strength and deflection of glass, under different wind loading. Although the Standard and the Supplement can be purchased separately, you can purchase them together to SAVE on the total price compared to purchasing the publications individually.
