Meet the 11 new faculty members that have joined the Gerstner Sloan Kettering (GSK) Graduate School of Biomedical Sciences.

Eleven Scientists Join World-Renowned Faculty at Gerstner Sloan Kettering

A Sussex team—including university mathematicians—have created a new modeling toolkit which predicts the impact of COVID-19 at a local level with unprecedented accuracy. The details are published in ...

A modelling toolkit to predict local COVID-19 impact

Most biological traits are inherited via genes, but there are exceptions to this rule. Two teams from the University of Geneva (UNIGE) have been investigating the location of centromeres—specific ...

Inherited memories of a chromosomal site

Two teams of researchers at the University of Geneva (UNIGE) have discovered that the location of the centromere--a specific chromosomal site that holds duplicated chromosomes together and plays an ...

Memory of Centromere Encoded in Epigenome One Generation Deep

Key to climate-resilient chicken lies in changing genetics, according to study in Ethiopia. The genetic make-up of indigenous chickens has changed to better cope wi ...

Key to climate-resilient chicken lies in changing genetics, according to study in Ethiopia
The study demonstrates that they modulate different ... heterogeneous particles made up of mRNAs and proteins that guide them to their final destinations. "The functional interactions between ...

Cell biology: Masters of synapse modulation

"This paper will enable many scientists to use this new platform to study the human disease of ... change our understanding of human biology and medicine." The protocol will allow scientists ...

Scientists publish a how-to guide for creating mouse-human chimeric embryos

The presence of a flawed image in a scientific study doesn ' t necessarily invalidate ... The forms and patterns in biology are endlessly unique; Bik knew that these duplications couldn ' t ...

How a Sharp-Eyed Scientist Became Biology ' s Image Detective

So they left the nest in the same place, but put the bee ' s learned pattern over an empty nest and the bees chose the empty nest, showing that they were using the pattern as a guide, not smell or ...

Study: Nocturnal Sweat Bees Able to Distinguish Dorsal Landmarks during Homing

Sussex mathematicians have created a new modelling toolkit which predicts the impact of COVID-19 at a local level with unprecedented accuracy.

Sussex mathematicians develop ground-breaking modelling toolkit to predict local COVID-19 impact

In studying the Santa Cruz long-toed salamander, Leyna Stemle is hoping to provide data to help prevent the extinction of the species.

Graduate student documents the ecology of endangered salamanders

The work, published in the journal *Communications Biology*, investigates a class of ... clusters induce more potent activation. The current study, led by Dr Ben Yu and Professor Mark Cragg at ...

New insights on how an important class of immune receptors are activated

To lessen our reliance on animal models and better guide the use of human clinical ... It is designed to help researchers discover new biology, study the mechanisms of epithelial barrier ...

Organs-on-Chips: Expand the Boundaries of In Vitro Testing

A staged alert system, designed by scientists and public health officials to guide local policies ... the journal *Nature Communications*. In a new study led by The University of Texas at Austin ...
