Prevent Costly Home Repairs with Proper Grading and Drainage. Standing water near your home ' s foundation caused by improper grading or faulty gutters and downspouts can cause damage, including slab movement, retaining wall failures, and slope instabilities. It can also lead to serious foundation problems, requiring costly repairs to your home ' s structural system.

Proper Grading and Drainage Prevents Costly Home Repairs

Home improvements and repairs also take up a large amount of your budget, but they're essential to maintaining—and maybe even increasing—the value of your home. But home repairs can be expensive.

6 Crazy Expensive Home Repairs—and How to Avoid Them...

The cost of repairing and sealing a busted foundation can start at \$10,000 and can go as high as \$40,000 [source: Edge]. The best way to avoid this extremely costly repair is to keep water far away from the foundation. When a home is constructed, the ground around the foundation should slope slightly away from the house. If not, rainwater will pool around the foundation and exploit any structural weakness to seep its way into the house.

10 Home Repairs That Can Seriously Break the Bank...

Experts estimate that the average annual cost of home maintenance and repair is 2-4% percent of a home ' s value. So, for a \$200,000 home, that ' s up to \$8,000 in repairs per year, on average. With that in mind, here ' s what you need to know about the most costly home repairs.
