The GIF file is a form of bitmap images, meaning the graphic is composed of many tiny parts called pixels, just like the JPEG and PNG file formats. This file type is based on LZW (Lempel-Ziv-Welch), a special form of the lossless data compression algorithm. A GIF is most suitable for storing graphics with a few colors, such as simple diagrams, shapes, and logos, rather than gradients.

The Different Types of Files and How to Use Them

Computer Engineering I All about designing and building computers –Silicon chip design –Combining chips into systems –Combining systems into networks –Helping systems recover from failure –Software design to help computers run faster and more efficiently. 5 - ENGIN112 12-06-02 L1

Introduction to Computer Engineering

This is a list of file formats used by computers, organized by type. Filename extensions are usually noted in parentheses if they differ from the file format name or abbreviation. Many operating systems do not limit filenames to one extension shorter than 4 characters, as was common with some operating systems that supported the File Allocation Table (FAT) file system.
