Data Domain Operating System 6.2 Administration Guide

EMC Data Domain Archiver consists of an EMC Data Domain controller with the DD Archiver configuration, the DD Archiver license, and a shelf capacity license for each storage shelf. If the DD Archiver feature is not enabled, the system behaves as a standard DD controller of the same model, with its specified maximum usable storage capacity.

EMC Data Domain Boost (DD Boost) enables backup servers to communicate with storage systems without the need for Data Domain storage systems to emulate tape. The software has two components: IDD Boost libraries that you install on each backup server to integrate with the DD Boost server that runs on the Data Domain system.
