Note-taking (sometimes written as notetaking or note taking) is the practice of recording information from different sources and platforms. By taking notes, the writer records the essence of the information, freeing their mind from having to recall everything. Notes are commonly drawn from a transient source, such as an oral discussion at a meeting, or a lecture (notes of a meeting are usually ...

Using the Analyze Linear Function Notes, I will first ask students to label the slope and y-intercept of the equation on the top of their paper ($y = 2x + 1$). They should then graph the line on the coordinate plane provided. Next, I will ask students to pick four points that are on the line as well as four points that are not on the line.

This worksheet can be used to introduce systems of linear inequalities or for students to practice. At the top, there is a place for students to make notes about the boundary line (solid or dashed) depending on the inequality symbol, how to determine which region is supposed to be shaded, and what it means to be a 'solution' of a system of linear inequalities.
