Handbook of pharmaceutical excipients | Oxfam GB | Oxfam ' s ...

Pharmaceutical excipients are the substances other than the active drug, used in pharmaceutical dosage forms. The excipients are considered as inert substances, i.e., they do not have any active role in therapeutics, but they can be used to support the process to produce an effective product (Dureja and Kumar, 2013). Some active ingredients or medicaments cannot be easily administered and absorbed by the human body; in that case, an appropriate and suitable system is required in the form of ...
