Instant Apache Activemq Messaging Application Development ...

The destination that we send the scheduled message to is the one that the broker will use to later deliver the message. Our sample application uses the predefined message header values in the ScheduledMessage utility class provided in the ActiveMQ Client JAR; however, these are just

Where To Download Instant Apache Activemq

string values, so you don't absolutely need to import that class into your code. The available header values for scheduled messages are shown in the following table:
