Practice Volumes Of
Prisms And Cylinders
Answers

Cylinders are,
essentially, just prisms
with a circular base, so
finding the volume of a
cylinder is just like
finding the volume of a
cylinder. The formula
for the volume of a
prism is $V = B * h$,
where V is volume, B is
the area of the base, and

Download File

PDF Practice

h is the height of the prism. The base of a cylinder is a circle, which has area πr^2 .

Height, obviously, is the same in a cylinder as it is in a prism.

Quiz & Worksheet -

Finding the Volume of

Prisms and ...

So the volume of a prism is the area of the base (B) multiplied by the height between the bases (h), which we can just write as $B * h$. Now, back to that tent. The front, or face, is a triangle. If...
