Telecommunication networks

utilize light for information transmission

(Chefles, 2004).

The reason for this is simple according to

Read Online Telecommunication

Keiser (2003): a

fiber optic cable is able to transmit 1000

times the information capacity of a copper wire.

However, computers among other electronics still use copper as the

Read Online Telecommunication Networks And
conductive medium.

Therefore, the advantages of light-based communication have yet to improve computing performance.
