In 1901 Nikola Tesla was one the first to identify “ radiant energy. ”

Tesla says that the source of this energy is our Sun. He concluded that the Sun emits small particles, each carrying so small of a charge, that they move with great velocity, exceeding that of light.

Conclusion. Yes, it is possible Tesla did find an infinite and potentially limitless energy source, and both the military and NASA are most definitely researching it today.

Tesla not only discovered this energy source, he also was capable of
